

What is Digibeetle?

The online knowledge and search tool for legal data & AI professionals, such as your legal staff, compliance officers and DPO's, who advise on data & technology related matters.

The digital instrument to stay up-to-date with relevant EU case-law, legislation and supervisory authorities' documents, all curated by seasoned experts.

The perfect way to maintain the overview, to discover insightful relations between the sources, and to stay informed. All needed to craft the best possible strategies and public policies on digital matters.

Why do you need it?

Required by professional ethics and laws. Your staff needs to be AI-literate, according to the AI Act. DPO's are obliged to maintain "expert knowledge of data protection law and practices". Professional standards of legal professionals, such as in-house lawyers, mandate that their work is based on the latest legal developments. We provide that information.

Keep up with the outside world. Other governmental institutions and partners are already using Digibeetle. [See our featured customers.](#) Keep up with them and write the most insightful policies and strategies. Check, counter and be ahead of any arguments of the outside world. With Digibeetle you won't lag behind.

Save valuable time. Time based on the tax-payers' money. Especially relevant for governmental organisations with tight budgets and demanding deadlines. With Digibeetle, quickly find the sources to work as cost efficient as possible.

Why do you need it now?

Avoid lagging behind. Every day, legal data & AI professionals are confronted with an avalanche of information: new cases, laws and documents. This goes beyond the GDPR, and includes the AI Act, Data Act, DSA, European Commission decisions, AI Office documents, and many, many more sources. Digibeetle provides the necessary insights between these sources, based on an intuitive search.

Laws and professional ethics expect you to maintain expert knowledge. The AI Act for instance, expects that staff who work with AI systems are AI literate. This affects all your staff who advise on AI related matters. Digibeetle helps them to understand the act. Start to act in line with the AI Act now.

Accelerate your organisation's success. The sooner you'll start with Digibeetle, the faster your legal professionals will become more knowledgeable, which enables them to help your organisation faster and to be more prepared to draft the best public policies and strategies imaginable.

Why pay for information that can be found online?

We provide more than that. Not everything on the Digibeetle platform can be found online, thanks to documents we retrieved through Freedom of Information Access requests. In addition, our value relates to our

- **Intuitive search**, which enables you to search instantly in all necessary sources;
- **Visualisation of the interconnection between the sources**, which uncovers insightful links who would have otherwise been hidden;
- **Constant updates**, to avoid missing important legal developments.

All these advantages cannot be found online. Unsurprisingly, even personnel who work at the organisations which are covered by Digibeetle use our platform. Their own databases and websites cannot achieve what we provide.

Why Digibeetle? We already have {insert name of expensive service}

It's very well possible that your organisation already uses one or more tools, usually those provided by big legal publishers and usually quite expensive. Unlike Digibeetle, none of these services are created specifically for legal data & AI professionals, are as quickly updated or are curated and maintained by such professionals.

Cost-benefit analysis

Invest in your people, not more caffeine. A 1-year access to Digibeetle costs EUR 55 p/month per user – and the price per seat decreases the more licenses you purchase. This means that, for the price of less than 1 cup of cappuccino* every other day, you'll instantly benefit from:

More knowledgeable legal personnel such as your policy writers, compliance officers, in-house lawyers and DPO, which reduces their risks of drafting advice and strategies without seeing the full picture of the legal data & AI field. This decreases room for errors and increases overall quality of work;

Your legal personnel with more peace of mind, thanks to the overview of up-to-date sources in Digibeetle, who will be able to meet the organisation's demands faster in a more cost efficient manner;

A tool that helps your personnel to maintain their AI literacy. The longer you wait with this, the higher the costs will be to get your employees up to the required literacy level.

* Cappuccino in Amsterdam

The image shows a screenshot of the Digibeetle platform interface with several overlapping panels. The panels are:

- Latest SA documents** (blue header): Lists documents like 'EDPB Statement', 'law enforcement', 'EDPB First DPF', 'EU-US Data Privacy', 'EDPB CSC SIS II', 'Second generation', 'EDPS SA Opinion', and 'EDPB Guidelines' with a 'View all' link.

- Latest judgments** (purple header): Lists 'Facebook and S', 'performance of a', 'sensitive data', 'Lindenapotheke', 'competitors bring', 'health data', 'spe', 'Agentsia po vpis', 'company registers', 'non-material dam', 'personal data', and 'Bezirkshauptma' with a 'View all' link.
- Cases past 7 days** (purple header): Lists 'Hearing held' with 'EDPS v SRB App' and 'pseudonymisation' with a 'View all' link.
- New cases** (yellow header): Lists 'Proceedings initi', 'Across Fiduciaria', 'Your personal dr', 'Questions/pleas', 'CJEU KvK v VVZE', 'open data', 'elec', 'Naltov', 'access to personal', 'Brillen Rottler', 'right to compensa', and 'right of access' with a 'View all' link.
- Upcoming cases** (green header): Lists 'Hearing scheduled' with 'Commission v Hungary (Values of the EU)' (19 Nov), 'WhatsApp Ireland v EDPB Appeal Case' (26 Oct), 'Inteligo Media' (27 Nov), and 'Policejní prezidium (Storage of biometric and genetic data)' (28 Nov). It also includes 'A-G opinion scheduled'.

If we buy Digibeetle, what exactly do we get?

1-year long access to the online service for every user you bought a license. Those users will enjoy the following benefits:

- Updates for 365 days
- Weekly update email service
- Future updates for current and new sources
- Full support (business hours)
- Request new features
- Upvote features on the roadmap
- Upvote new sources

If you want Digibeetle for the entire organisation, then we offer the following benefits:

- Effortless new user administration
- Dedicated support for onboarding employees
- SSO-possibility (based on additional costs)

Fair and transparent pricing

The license costs are the only costs. You won't have any operational or support costs, because Digibeetle does not need to be implemented. We take care of maintenance, upkeep and support.

Solo

If you need just 1 license, it costs EUR 55 per month (billed yearly) or EUR 65 per month (billed monthly). 21% VAT excluded, where applicable.

Team license

If you purchase more than 1 license for the team, it costs EUR 49 per month (billed yearly) or EUR 59 per month (billed monthly). 21% VAT excluded, where applicable.

Enterprise

If you need Digibeetle access for the whole company, then contact us for a bespoke offer. This will have attractive pricing, irrespective of the amount of users. You'll receive just one invoice per year.

Digibeetle is a one-of-kind in what it offers

- An information tool specifically tailored for the legal data & AI professionals, who need to work the laws and case-law of the EU Digital Rulebook and who cannot afford to lack essential knowledge when advising the business.
- You decide which new sources will be prioritised and which new features are the most important for your industry. No existing service offers this far-reaching customer cooperation.
- Our pricing is the most competitive on the market, and unmatched in the legal service space. By doing so, 'price' should not be an issue.

Getting access and other practical concerns

We will guide your team, help them get started, and make the most out of Digibeetle. For organisations that have a team or enterprise plan, we offer the possibility to do a bespoke online demonstration during which we can show best practices that are relevant for the team.

- **Access:** The only thing you have to do is direct your colleagues to the Digibeetle website. You don't have to install anything.
- **Support:** If needed, we will provide them with support why they can easily request via email or our chat function.
- **Data processing and security:** We process no personal data, other than the email address of our users and - if they voluntarily provide us this information - data about their profession, for example. IP-addresses are processed for security reasons. Learn more about the minimal processing activities in [our privacy statement](#). No data protection agreement is needed, because we act as the sole data controller regarding the data processing.

Who is behind Digibeetle?

Digibeetle is the brainchild of Joost Gerritsen. A well-respected data & AI lawyer, lecturer and researcher based in The Netherlands. When Joost started his law firm in 2016, he quickly learned how hard it is to keep track of all relevant developments within the area of data law. Case-law, documents from various authorities, and legislation. You have to know all these things, but it is nearly impossible given the rate of new documents coming out. And what's important and what is not? He needed a solution to the ever growing amount of documents. Nobody offered this. It was time to fix that. But how? Luckily, Joost found Jan Willem Hoogstraten, an expert in web design and IT. They founded and built Digibeetle, together with programmer Anastasia.

Our mission

To protect you and your staff from the information overload,
guiding you through the jungle of digital & data laws, case-law and documents.
